

YOUR CHEMICAL APPLICATION

Storage Tanks • Pipes • Impellers • Mixers • Blending Tanks
Mixing Vessels • Valves • Hoppers • Reactors • Digestion Tanks
Pumps • Conveyors

YOUR REQUIREMENTS

Release • Wear Resistance • Sliding • Traction • Hardness
Corrosion Protection • Abrasion Resistance • Chemical Resistance
FDA Compliant Formulas • CrVI-free Surfaces • Various Combinations

YOUR ADVANTAGE WITH IMPREGLON

Impreglon offers Superior Quality, Service & Application
Expertise for Industries around the Globe.

CHEMICALS

ENGINEERED SURFACES

FOR PROCESS STABILITY AND IMPROVED
PRODUCTION EQUIPMENT

SURFACE PROTECTION FOR BETTER PROCESSING

BLOWER HOUSING

- Compression of aggressive process gas
- High chemical resistance
- Easy clean
- High temperature resistance

DIFFUSOR PLATE

- Improvement in flow speed
- High chemical resistance
- Good impact absorption
- Easy clean
- High wear resistance

IMPELLER

- Transport of aggressive chemicals
- High chemical resistance
- Easy clean
- High wear resistance

SIZE TUB

- Handling of aggressive adhesives
- Nonstick surface
- Easy clean
- High chemical resistance

Chemical processes are sensitive to all outside impurities and contaminants that enter into the equipment and process as it moves throughout the plant. In addition, the protection of production components in contact with aggressive media represents an extreme challenge for today's coating systems. These coating systems must be absolutely non-porous and resistant against various chemicals for many years. Easy to clean, high temperature resistant, "non-stick" surfaces exceed the requirements for the toughest environments.

With custom-tailored coating solutions, worldwide technical expertise, and 20 years experience in the field of industrial coatings, Impreglon is the ideal partner for the chemical industry.

SILENCER

- Noise reduction in production processes
- High chemical resistance
- Easy clean
- High temperature resistance

VALVE BODY

- Flow control of chemicals
- High chemical resistance
- Easy Clean
- Good wear resistance

MIXING VESSEL

- Mixing process for paint and varnishes
- Nonstick surface
- Easy clean
- High chemical resistance

REACTOR

- Chemical process equipment
- Easy clean
- Good chemical resistance
- High temperature resistance
